

At Radisson Hotel & Suites Sydney, we know that climate change is an important issue and are working with our guests to find solutions.

We've teamed up with Climate friendly to offer our guests an easy way to offset the emissions associated with your stay to help reduce the amount of greenhouse gas emissions being released into the atmosphere.

For just \$2.50 (inc. GST) a night, you can purchase renewable energy carbon credits that offset emissions associated with your hotel stay. Your contribution will be passed in full, to Climate Friendly who will purchase energy credits equal to the emissions produced during your stay. A certificate acknowledging your contribution can also be sent to you via email.

For detailed information about the renewable energy projects that you will be supporting please go to www.climatefriendly.com/projects

How Climate Friendly and Radisson Hotel & Suites Sydney are working to reduce the climate impact of your stay.

When you choose to make your stay Climate Friendly at Radisson Hotel & Suites Sydney, your contribution will be used to purchase the amount of renewable energy credits equal to the emissions produced during your stay. (Calculations are based on historical averages of energy consumed over the previous 12 month period).

Climate Friendly is a world leader in helping business and individuals lower their carbon footprints, and is supported by WWF internationally. Climate Friendly purchase only the highest quality, independently verified carbon credits from renewable energy projects such as wind farms, that are independently audited and meet the highest international standards.
